EDUCATION

Cornell University   Ithaca, NY

BSc in Computer Science *GPA: 4.10*   Aug 2023 – Dec 2026

Coursework: *Object-Oriented Programming & Data Structures, Functional Programming, Systems Programming, Discrete Structures, Database Management Systems, Analysis of Algorithms, Computer System Organization*

EXPERIENCES

Google   Sunnyvale, CA
Software Engineer Intern on Google Chat   Jun 2025 – Aug 2025

- Authored 30-page design doc for supporting external users in discoverable spaces, and subsequently implemented it in Boq (Java) and Wiz (JS).
- Brought the stickers feature to 10M+ users by making its education promo + fixing dozens of critical UX bugs.
- Earned a spot bonus for contributions beyond core projects, such as shipping read receipts in embedded clients and creating a PRD for Markdown link rendering.

Cornell Digital Tech & Innovation Student Project Team   Ithaca, NY
Developer Lead   Oct 2023 – Present

- Handling logistics, education, and hard technical issues for the 35+ developers on Cornell's largest project team.
- SP25 & FA25 instructor for Trends in Web Development, a for-credit class with ~40 students/semester.

AlgoLink   Remote
Software Engineer Intern   May 2024 – Oct 2024

- Led devops & full-stack React + Django work for an HR startup's web platforms while studying in Hong Kong.
- Delivered realtime chat, secure JWT middleware, AWS CI/CD pipelines, email verification, and admin management system; also implemented all Figma designs.

Student Agencies   Ithaca, NY
Director of Enterprise Technology   Mar 2024 – Jul 2024

- Centralized Salesforce, Homebase, and Sharepoint logistical data in an SSR dashboard for a shipping firm with $2.5M+ in revenue using shadcn/ui and Firebase.
- Created a TypeScript heuristic to optimize appointment fulfillment and automated shift scheduling, package labeling, and shipment tracking via FedEx & GCal APIs, saving managers 10 hrs/wk.

Rockwell Automation   Prague, CZ
Embedded Software Engineer Intern   Jan 2023 – Jun 2023

- Developed a multithreaded hardware reservation system for use by ~100 company engineers.
- Shipped internal Python package, created Django API, and connected GUI app to bespoke MySQL database.

SKILLS & SELECTED SIDE PROJECTS (MORE AT [O]/DESTAQ)

Languages & Frameworks: TypeScript, Go, Python, Java, OCaml, Svelte, Vue, React, Flask, LaTeX
Tools & Packages: PostgreSQL, Git, Supabase, Firebase, Tailwind, Digital Ocean, Spacy

Lingotrack *Go, TypeScript, SvelteKit, Postgres, Digital Ocean*   lingotrack.com
Full-stack social platform (~20k views/mo, $1.5k ARR) ft. websockets and a CDN that empowers language learners to track their progress and connects them with accessible media. Inspired by my fluency in Mandarin.

Locadapt *TypeScript, Supabase, Next.js, SvelteKit, Coudflare for SaaS, Anthropic*   locadapt.com
B2SMB service that takes any site multilingual in 2 lines of code. Includes reverse DNS proxy, asynchronous Web Workers, dynamic content support, and from-scratch affiliate program. 6-figure investment offer.

GCal Wrapped *TypeScript, Python, Express, Svelte, Supabase, Compute Engine*   gcalwrapped.com
Spotify Wrapped-inspired web app that integrates with Google Calendar and Gemini to display an animated, shareable analysis of a user's semesterly habits. Gained 2K+ users across 60 universities in <2 weeks.

SELECTED ACHIEVEMENTS

1517 Medici Grant   1517 Fund
Received a $1000 non-dilutive VC grant to fund operations for my startup Bump Platforms LLC.   Apr 2025

Best App Built on Groq   Hack the North
#1/43 teams for Groq's track at Canada's largest hackathon with our multimodal AI note-taker.   Sep 2024

LinkedIn & Cisco Sponsor Awards   BOOM
ColdCraft.ai won 2/5 corporate sponsor awards at Cornell's school-wide annual project fair.   Apr 2024
