Education

Cornell University — Ithaca, NY

B.S. in Computer Science — *GPA: 4.03* — Aug 2023 – Dec 2026

Coursework: Object-Oriented Programming & Data Structures, Functional Programming, Systems Programming, Discrete Structures, Database Management Systems, Analysis of Algorithms, Text Mining, Computer System Organization, Programming Languages & Logics, Computer Networks

Extracurriculars: Co-founder, Armada; Developer Lead, Cornell Digital Tech & Innovation; three-semester instructor, Trends in Web Development; Czech teacher, Language Resource Center

Recent Experience

Google — Seattle, WA

Software Engineer Intern on Google Maps — May 2026 – Aug 2026

- Owned product engineering for an internal debug & prototyping tool with 1.5k+ active users, shipping 70+ PRs.
- Designed and implemented a full-stack Java/Angular pipeline for cloud-backed sharing of page states, including access control, updates, expiration cleanup, and bidirectional compatibility with legacy URLs.
- Drove direction through stakeholder roundtables and 1:1s across the organization, reworked thousands of lines of architectural debt, enabled debugging for 3D maps with C++, and delivered 20+ UX improvements.

Monarcha (YC S25) — Remote

Software Engineer — Dec 2025 – May 2026

- Built critical product & platform systems for a document digitization company in a 25 hr/wk engineering role.
- Delivered multi-tenancy, client API access, Slack bots, line extraction, and more; 140k+ lines of code contributed.

Google — Sunnyvale, CA

Software Engineer Intern on Google Chat — Jun 2025 – Aug 2025

- Authored 30-page design doc for supporting external users in discoverable spaces, and subsequently implemented it in Boq (Java) and Wiz (JS).
- Brought the stickers feature to 10M+ users by building its education promo + fixing dozens of critical UX bugs.
- Earned a performance bonus for contributions beyond core projects, such as shipping read receipts in embedded clients and creating a PRD for Markdown link rendering.

AlgoLink — Remote

Software Engineer Intern — May 2024 – Oct 2024

- Led DevOps & full-stack React + Django work for an HR startup's web platforms while studying in Hong Kong.
- Delivered realtime chat, secure JWT middleware, AWS CI/CD pipelines, email verification, and admin management system; also implemented all Figma designs.

Student Agencies — Ithaca, NY

Director of Enterprise Technology — Mar 2024 – Jul 2024

- Synthesized Salesforce, SharePoint, and HR logistics data into a Firebase dashboard for $2.5M+ shipping firm.
- Created a TypeScript heuristic to optimize appointment fulfillment and automated shift scheduling, package labeling, and shipment tracking via FedEx & GCal APIs, saving managers 10 hrs/wk.

Skills & Selected Side Projects (more at */portfolio*)

Languages & Frameworks: TypeScript, Go, Python, Java, OCaml, Svelte, React, Angular, Flask
Tools & Packages: PostgreSQL, Git, Supabase, Tailwind, Google Cloud, AWS, Docker

Lingotrack *Go, TypeScript, SvelteKit, PostgreSQL, Digital Ocean* — lingotrack.com
Full-stack social platform (~20k views/mo, $1.5k ARR) ft. websockets and a CDN that empowers language learners to track their progress and connects them with accessible media. Inspired by my fluency in Mandarin.

Locadapt *TypeScript, Supabase, Next.js, SvelteKit, Cloudflare for SaaS, Anthropic* — locadapt.com
B2SMB service that takes any site multilingual in 2 lines of code. Includes reverse DNS proxy, asynchronous Web Workers, dynamic content support, and bespoke affiliate program. 6-figure investment offer. Licensed out IP.

Selected Achievements

1517 Medici Grant — 1517 Fund
Received a $1,000 non-dilutive VC grant to fund operations for my startup Bump Platforms LLC. — Apr 2025

Best App Built on Groq — Hack the North
#1/43 teams for Groq's track at Canada's largest hackathon with our multimodal AI note-taker. — Sep 2024

LinkedIn & Cisco Sponsor Awards — BOOM
ColdCraft.ai won 2/5 corporate sponsor awards at Cornell's school-wide annual project fair. — Apr 2024
